

For Business

WightFibre Voiplicity Phone System

Full-fibre business phones

WightFibre offers a range of handsets that are known to work with our VoIP telephone system. To make sure that you experience the quality of calls that you'd expect, only IP devices from our portfolio can be used. WightFibre's choice of tested Yealink handsets can be found on the next page.

Full-Fibre IP Phones are ideal for businesses of all sizes. We configure them for you, so they're easy to setup and work just like the phones you're used to.

If you're switching to WightFibre from another phone provider, or simply looking to add more handsets to your existing service, have a look through

our range to find the perfect phone for your needs.

Further Information

Why Choose WightFibre?

We're local

WightFibre is the only Island-based provider of broadband and telephone services. We only use:

Island engineers

Island support staff

Island call centres

We're fast

The fastest broadband on the Island, powered by state of the art technology. Work faster, harder and quicker.

We're good value

We'll provide you with what your business needs — and make sure that you don't waste money on features that you won't use.

We're flexible

You can upgrade your services as your business grows. Our systems can adapt to your needs as and when you need them to, giving you a future-proof system that is always up to date.

We take your security seriously

Nothing left to chance. We have a Tier 3 data centre and a fully secure, resilient network with multiple links to the mainland. In other words — we've got you covered.

Great call packages

Keep the costs of communicating down — even when calling mobiles or internationally.

Trust us...

...to help you make the most of your business. We get 'excellent' ratings on Trustpilot. Compare us to the other providers...
